## Rediscover the Joy of Your Deck or Patio...with a SunSetter Awning!

***Sun or shade — now the choice is yours, with the smart, affordable solution to deck and patio comfort. Transform your deck into a beautiful, protected retreat in seconds, and enjoy outdoor living to the fullest!***

Dear Fellow Deck or Patio Owner:

A beautiful, simple-to-use, retractable SunSetter Awning will turn your deck into a wonderful "outdoor room" where you and your family will love to spend time. Relax and entertain — cool, comfortable and protected from hot sun and glare, harmful UV rays, and light passing showers. Discover how much more enjoyable outdoor living can be.

### **A SunSetter Retractable Awning Lets You Control the Weather...**

With a SunSetter Awning, you'll get much more use of your patio or deck because you can use it rain or shine. You decide whether you want full sun or total protection. No need to stay off the deck because the sun gets too hot. Even at high noon on the hottest summer day it can be as much as 20 degrees cooler under your SunSetter! Does it look like rain? You don't have to move inside because of a passing shower. Just open your SunSetter and you've got instant protection from showers over you and your patio furniture.

Now you can plan outdoor parties or cook-outs without fear that the weather will spoil them. Give the kids and pets a protected place to play. Enjoy the outdoors without being broiled by the sun or exposing your family to harmful UV rays. Keep the sun from fading your indoor rugs and furniture through your sliding glass doors. Yet when you want to bask in the sun, just retract your SunSetter and you have your complete open deck again in less than one minute!

*"We're very happy with our awnings."*

Gloria J. Stickley

*"It's just great! My neighbor saw it and had to have one, too."*

Wm. Buckridge

*"We have received many compliments on the awning's beauty, functional design, and how it provides much-needed shade and protection from summer showers."*

Stan Kucinska

(Over...)

## Compare SunSetter to the Alternatives...

Until now, if you wanted protection on your deck or patio, you had only limited choices. You could go with a patio umbrella — but anyone who has used one will tell you that's a real compromise. You have to keep adjusting the umbrella as the sun moves, and it really doesn't offer a very large protected area. An umbrella seldom keeps everyone dry during a shower. It's also tippy in a breeze. And have you priced one lately? They're either so cheaply made you wouldn't want one, or else they cost a fortune for what you get.

Finally, a fixed roof or porch will certainly protect you in most conditions, but if you want to enjoy the sun, forget it! A fixed roof isn't a morning's easy do-it-yourself installation — and the cost of a fixed roof can be 6-10 times the price of a SunSetter.

## A SunSetter Awning will Save You Money on Energy Costs, too!

When open, SunSetter awnings prevent solar radiation from penetrating through the glass and heating up the inside of your home to lower your air conditioning bills and increase energy savings. Unlike a fixed roof or porch, you can also save energy in the winter by closing your SunSetter and letting the sun heat up your home. Awnings not only save money for homeowners but also contribute to a reduction in demand for energy, thus directly reducing the impact of global warming from greenhouse gas emissions. Installing an awning is one simple upgrade homeowners can make to reduce their home cooling energy, contributing to an overall decrease in their carbon footprints.

## Exceptional Quality at Truly Affordable Cost

**Not by compromising on quality.** Every SunSetter is made under the strictest quality control, from materials designed for year after year of trouble-free, maintenance-free operation. We have you covered with two great fabric choices. Our woven acrylic fabrics are 100% solution dyed to resist fading, clear coated to make them water repellent, and woven to offer you a wealth of gorgeous, exclusive colors in beautiful vertical stripes and rich solid colors. Our traditional laminated fabrics consist of 5 layers for durability, fade resistance and 100% waterproof protection. Both fabrics give you 99% protection from harmful UVA and UVB rays. You're sure to find the perfect color for your home.

You'll find that kind of quality in every SunSetter frame component as well. From the strong, lightweight, aircraft-quality, rust-proof aluminum hardware to the rugged gear mechanism that has been tested for thousands of cycles without failure, and a Somfy® Electric Motor — the world's best — on the SunSetter Motorized Awning. An independent lab tested our awnings for wind resistance and all our models withstood winds between 55 and 75 mph without damage!

No, the secret to our affordable cost is that we are the largest home awning manufacturer in America, and we make these awnings ourselves. That means we can standardize production, control our material and inventory costs, buy components in large volume, and pass the savings on to you.

We process your order immediately, and deliver your awning to you fast — generally in less than two weeks.

The SunSetter Motorized XL extends out a full 11 feet 8 inches!
